Drug Discovery

UNIVERSITÉ LIBRE DE BRUXELLES

The Analytical Platform of the Faculty of Pharmacy - APFP is a technological platform of the Université libre de Bruxelles (ULB) specialized in Mass Spectrometry (MS) and Liquid Chromatography (LC). We offer access to several apparatus and to the expertise of the different laboratories of the Faculty.

Research & Innovation

As part of the academic world, our core business is **Research & Innovation**. Our efforts to develop new analysis techniques and our expertise and knowledge is also **valuable to industrial partners!**

Custom design of analysis

We develop and validate analytical methods for your needs. Available applications are i.a. **biotherapeutics characterization** and **biomarker assay** by mass spectrometry, liquid chromatography, spectroscopy, electrochemistry etc. We also have experience in **pre-formulation** and **formulation** aspects.

Reporting and results interpretation

The **characterization** of new products and/or impurities and the **development** and **validation** of methods for **(bio)pharmaceuticals** materials are some of our latest successful industrial partnerships.
